1 SITE ASSESSMENT

1.1 RMTC 215TH CORPS SHORABAK – HELMAND PROVINCE

1.1.1 INTRODUCTION

The enclosed information contains details of a recent Site Assessment Survey and associated information undertaken by MACTEC, Inc. in March 2010. The purpose of the survey is to:

- Facilitate the future construction of the RMTC
- Identify land requirements, site opportunities and constraints
- Survey the designated land and verify land ownership
- Provide data and background information necessary for a contractor to implement a timely and efficient construction program
- Identify any constraints that may require remediation prior to or during the construction process

The following survey will identify key factors such as:

- Land Ownership
- Adjacent land uses
- · Impact (if any) of construction on adjacent land
- Availability of utilities to the Site
- Existing facilities & structures
- Access roads
- Potential security issues / concerns
- Environmental constraints
- Land Ownership Certificate
- The following area resources:
 - Raw construction materials
 - o Transportation to and from the site for construction material and equipment
 - Labor force
 - Emergency facilities in close proximity to the site

The Site Assessment Survey for RMTC 215TH CORPS Shorabak is part of and the basis for a Ministry of Defense (MoD) Facilities Master Plan which identifies required Land Area(s) and the location of required facilities within this area according to the SOR (Statement of Requirements).

This survey does not include non-scope items such as subsurface investigation and civil survey. This Site Assessment Survey was produced under the direction of the Project Manager and reviewed by the MACTEC Kabul Project Principal.

David J. Wheeler,
MACTEC Project Principal
Kabul

1.1.3.1 LIMITATION

The findings and results presented in this survey is relative to information collated within the time period identified in the survey and should not be relied upon as to represent the circumstances and conditions of the reported site at a substantially later date.

Subsequent to the survey, if additional information or a change of circumstances on the Site in question occurs and may be considered to have impact or influence on the findings published in this report, then MACTEC requests the opportunity to review the new information and assess any potential impact, and if deemed necessary, modify the survey.

1.1.2 OVERVIEW

In March 2010, the MACTEC Site Assessment Team undertook an evaluation of an area of land near the 215th CORPS HQ Camp Shorabak in Helmand Province. The purpose of the Site Assessment was to confirm the location for a new RMTC. This parcel of land was previously identified for the RMTC.

As MACTEC was appraised of the Scope of Requirements (SOR) for the proposed RMTC, the team was able to draft a basic conceptual Master Plan which included all the proposed facilities and their respective space and logistical requirements. As the result of this, an overall requirement for site dimensions was generated which in turn facilitated the land and space requirement for the RMTC.

MACTEC then surveyed and assessed the proposed site and land to identify an overall suitable area for the RMTC. The Team confirmed the given grid references and any relevant topographical features for the overall site.

Subsequent to this, the MACTEC Team undertook its formal Site Assessment Survey with an evaluation as outlined in this report.

1.1.3 SITE ASSESSMENT SUMMARY

1.1.3.1 SITE OWNERSHIP

The site lies adjacent to the existing Camp Shorabak and it's Range Complexes. All land contained within the project site as well as surrounding neighboring land is owned by the MoD.

1.1.3.2 SITE LOCATION AND EXISTING CONDITION

The project site lies within an area of open land and is basically a flat area of 328,454 square meters. There are no existing facilities, services, or structures on the site. A man-made wadi runs through the southeastern portion of the site from north to south and will require being relocated adjacent to and parallel with the eastern and southern boundaries. There is a large existing ASP Bunker located in the southern portion of the site which will have to undergo demolition.

1.1.3.3 ACCESS

The only access will be through Camp Shorabak on roadways running east to west. Otherwise, there is no access routes to the project site.

1.1.3.4 FORCE PROTECTION & SECURITY

Due to the RMTC's location within the Camp Shorabak and MOD land, there are no security issues with regard to the site. However, the RMTC will require a secure external perimeter with all associated Force Protection measures for an ANA Camp to be supplemented by Guard Towers and Entry Control Point (ECP). There will be 35 meter set backs on the western and northern boundaries.

1.1.3.5 SURROUNDING LAND USE

The project site lies in open land due west of Camp Shorabak. The site borders future 215th CORPS facilities to the west with future JSAS operations beyond. To the north is open GoA Land and a reserved training area for the BWT. The 215th CORPS HQ Expansion area is on the eastern border of the site. USMC Camp Leatherneck borders the southern border and open land lies to the west.

1.1.3.6 UTILITIES

There is no existing water or sewerage at the project site, however there is power at the nearby existing Camp Shorabak.

1.1.3.7 RESOURCES

Within a catchments area of 5-30 kilometers there is an adequate supply of raw and construction materials and equipment, a local labor force, labor transport, and a highway for delivery of materials is available.

APPENDIX A FIELD REPORTS (ENGLISH AND PASHTO)

SHEET INTENTIONALLY LEFT BLANK

SITE ASSESSMENT CHECK LIST

Completed by Site Assessment Team prior to leaving the Site

Security: GOOD ✓ NORMAL BAD

Property Ownership questions:

Government Ownership

Elevation: 886 meter

Name of Site: 215th RMTC Camp Shorabak

Date of Assessment: 16- March- 2010

Names of Engineers: MACTEC Rep. Nimatullah Atif,

Hamid Basharmal

MoD Rep: Colonel Abdul Wadood

Location: : 650km to the southwest of Kabul city and 37 Km to the east of Main

city.

SITE GENERAL CONDITIONS

A. CURRENT LAND

The proposed site is an open land situated to the west of 215th Corps Maiwand, with an ammo bunker along with it. To the east of the site lays the 215th Corps Maiwand, to west lays the ROE open land, to north lays GoA open lands and to south lies USMC Camp.

Land is expandable towards East, West and North.

Land uses of the surrounding area:

North: GoA open lands

South: USMC Camp

West: ROE open lands

East: 215th Corps Maiwand

B. SITE CORNER LOCATIONS (GPS COORDINATES)

Corner Point 1 - Elev. 885m; 31° 51′ 36.7″ North, 064° 10′ 53.4″ East - See Photo A, B, C

Corner Point 2 - Elev. 886m; 31° 51′ 36.8″ North, 064° 10′ 37.9″ East - See Photo D, E, F

Corner Point 3 - Elev. 885m; 31° 51' 03.1" North, 064° 10′ 38.3" East - See Photo G, H, I

Corner Point 4 - Elev. 887m; 31° 52' 03.0" North, 064° 10' 53.7" East - See Photo J, K, L

C. EXISTING FACILITIES ON SITE

Two private residential houses are existing in Boya village in form house shape.

D. EXTRA MATERIAL AT SITE

There is about 250,300 SQM soil around the site which needs to be cleared off

E. UTILITIES

Electricity

There is no governmental electricity available but the 215th Corps generate power by power generators.

Water

Water level is 100m deep and people get their drinking water from wells around.

Sewage

There is no sewage system.

F. CONSTRUCTABILITY OF THE SITE

1. Vehicle access Asphalt Gravel Bad ✓ Under repair

The only problem for transportation is during the winter season, all the roads gets muddy.

- 2. Topography
 - a. Hills (Grids)
 - b. Depressions (Grids)

Corner Point 1 - Elev. 884m; 31° 51' 55.8" North, 064° 10' 38.7" East

Corner Point 2 - Elev. 884m; 31° 51' 55.9" North, 064° 10' 38.9" East

Corner Point 3 - Elev. 885m; 31° 51' 56.3" North, 064° 10' 37.8" East

Corner Point 3 - Elev. 885m; 31° 51' 56.1" North, 064° 10' 47.6" East

- 3. Wadi (Grids)
- 4. Drainage issues / flood control
- 5. Isolation

No need for isolation.

6. Mines & de-mining

No hazardous substances are located at the site.

G. LIST OF REQUIRED COMPONENTS

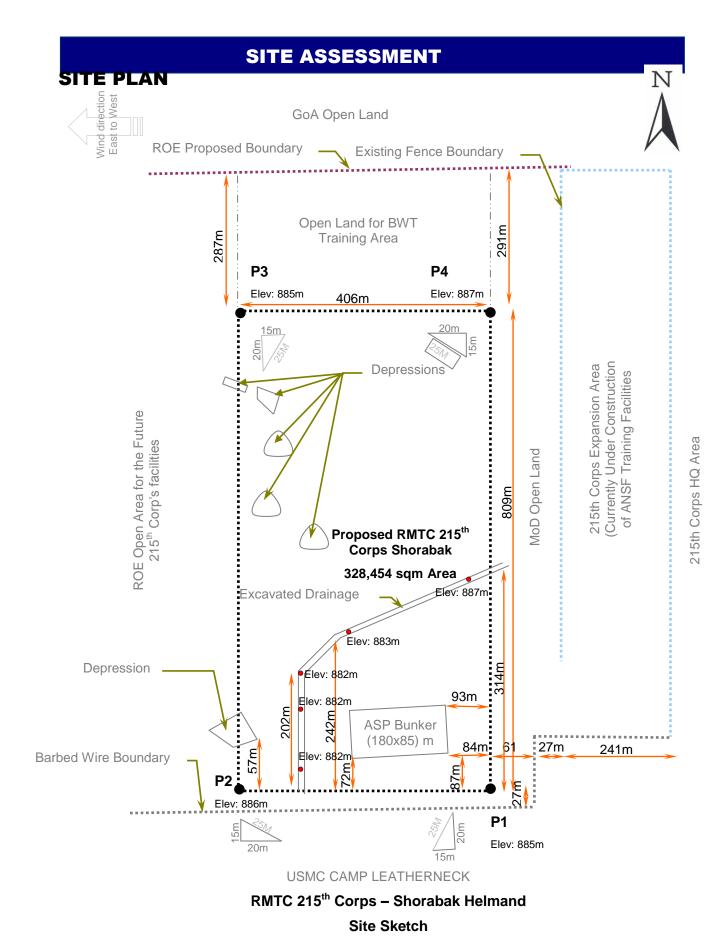

H. LOCAL or NEARBY RESOURCES:

- Unskilled laborers will be mobilized from Local 15 km Gerishk district located to east of the site.
- Skilled laborers will be mobilized from Local 15 km Gerishk district located to east of the site.
- Material like Sand, Gravel, Stone, Crushed: Not Available
 Y Available
 15 km To the east of the site.
- Other material like Cement, Steel bar, Brick, Lime, Gypsum will be mobilized from: Bricks, Cement, steel bars etc from Lashkargah 37km to the south of the site.
- Telephone Communication:

 Available, Not Available
- Fuel For heating and cooking Not Available
 Available (wood, diesel)
 Km to south of the site.
- Public Transportation Not Available Scarce ✓ Available (Buses, ✓ Taxis, Coaches)
- Construction Machinery and Equipment will be mobilized from Lashkargah, 5 km to the northeast of the site.
- Clinic Not Available ✓ Available 3.5 km to east

•	azardous substances disposed of on the property? Yes No√ a separate sheet, list items, quantity, and location stored.
	FION: The following documents were reviewed and attached to her any hazardous substances had ever been stored, released or he site:
CONCLUSION	S / RECOMMENDATIONS: On the basis of the information collected as

of the date of the survey, is it possible to reasonably conclude that hazardous substances have NOT been stored for one year or more, known to have be released, or disposed of on the property? Yes No

<u>CONCLUSIONS</u>: If there is reason to believe that hazardous substances have been stored on-site for one year or more, have been released to environment, or disposed of on the property, a complete explanation of the site condition shall be provided. This explanation shall include a description of the location, type, and quantity of the hazardous substance. For the purposes of complying with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), any presence of hazardous substances will be quantified as completely as possible; e.g., quantities of hazardous materials stored, released to the environment, or disposed of at the site. This information will be used for determining whether the quantities are over the CERCLA threshold limits. (Provide separate sheet.)

RECOMMENDATIONS: What are the recommendations for the mitigation of the problems identified on the property? The appropriate response action shall comply with all applicable laws, regulations, ordinances, conditions, instructions, policies, and guidance issued by the Department of Army, Environmental Protection Agency, State Agencies, or county and municipal agencies having jurisdiction to abate or prevent pollution wherein the property is located. (Provide on separate sheet.)

REMEDIAL ACTION PERFORMED ON THE PROPERTY: Note any remedial action that has been or will be taken to mitigate any problems that were noted either during the site inspection or that came to be known during the file search. Clean-up work performed on the site shall be quantified as much as possible; e.g., quantities of hazardous material removed from the site. Note the dates that any actions were performed. (Provide on separate sheet.)

Mactec Inc

To the respected Ministry of Defense 1.1.2

With all due respects:

As you know that National Military with the help of CSTC-A is developing and is in need of setting grid points and locations for the establishment and development of new facilities to be built. Mactec construction and Consultancy Company is in charge of locating, confirmation and surveying the land which are going to be established as new facilities for the national military units. Therefore CSTC-A is requesting for the support and cooperation of 8 staff from the Facility administrative and management department to assist CSTC-A for the survey of all the military units in all the corps in Afghanistan on a permanent base. The selected representatives are in charge of traveling with the Mactec personnel and will be trained on all the equipments provided from Mactec. All the 8 personnel from Ministry of Defense will be a direct representative from the Ministry of Defense and Afghan Government and will be holding a signed official document from the Ministry of Defense.

Mactec will provide all these 8 personnel per diem for each working day and there is a need of a meeting for the preparation and send off of the team with the Facility Administration and Management Department.

All the information is hereby mentioned for further process.

With regards

Lorenzo J. Valenzuela COL, EN Deputy Director.

To.

The respected Ministry of Defense

CSTC-A's proposal on introduction of 8 staff from the Facility Administration and Management Department for cooperation with MACTEC on the preparation and development of master plan is hereby presented to the Defense Minister for further guidance.

With Regards Head of Facility administration and management department. 03/12/1388
